Inside Story

Convenient drift / drip guard for more controlled spraying applications

Large pump handle for comfortable operation

Comfortable trigger with on/off lock

Large tank opening for easier filling and cleaning

High-density polyethylene tank is UV resistant

Four feet for stability

Applications Include:

Apply Fertilizers

Control Mildew

Coat Wood

Clean Automobile

How To Use

1. Measure and mix correct amount of liquid solution and water in a suitable container.
2. Pour mixture into the sprayer tank.
3. Reinstall the pump assembly - turn clockwise to tighten.
4. Pump the handle approximately 30 strokes to pressurize the tank.
5. Depress the trigger to discharge liquid.
6. To release the lock button, slide it backward.
