

Subject: The New Solo 433 Motorized Backpack Sprayer

Now POWERED by
HONDA™

This high-pressure sprayer from Solo with its 5 gallon capacity reaches a controlled operating pressure of up to 435 psi, enabling it to achieve fine spray mist applications, even at extreme heights.

Thanks to its push-pull piston pump, the powerful Honda Mini 4-stroke engine delivers a minimum flow rate of 0.5 gal/min at 435 psi.

A drain connector at the bottom of the tank enables liquids to be drained completely.

This sprayer is equipped with high quality dual flat fan jet nozzles and stainless steel nozzle screens and has a heavy-duty shut-off valve with pressure gauge.

POWERED by
HONDA™

Honda Mini 4-stroke engines are highly fuel efficient and run on regular gasoline, so there is never a need to mix gas and oil. The end result is less smoke and less odor, which literally means less headache for the user.

Model	433
Engine Type	Honda GX 25
Engine	4-stroke
Displacement	25 cc
Tank Capacity	5.3 gal
Stainless Steel Double Nozzle	Yes
Minimum Spray Pressure	14.5 psi
Maximum Spray Pressure	435 psi
Delivery g/min w/ stand nozzle	0.32 gal at 145 psi 0.45 gal at 290 psi 0.53 gal at 435 psi
Weight	18.3 lbs
Standard delivery	Stainless steel spray wand, pressure gauge, waist belt
Commercial Warranty	1 year
