

467 Backpack Air Blower

- New, powerful 66.5 cc engine with Nikasil[®] cylinder coating to generate a fan air volume of max. 824 cfm
- Aluminum crankcase and high quality engine components for increased power output even under high temperature operating conditions
- Increased engine performance converts to higher air velocity
- Improved fuel efficiency and reduced emissions with modern engine technology and catalytic converter
- Large 0.5 gallon capacity fuel tank combined with low fuel consumption allow long operating periods (more than 80 minutes without refueling)
- Quiet! Low dB(A) rating
- Easy starting, effective vibration dampening
- Single, multi-function operating handle with lockable throttle lever
- Air filtering system with high performance paper filter cartridge, which can be replaced without tools
- Strong tubular aluminum frame for protection and safe transport

Model	467
Solo Engine	2-cycle
Displacement	66.5 cc
Anti-vibration system	Yes
Electronic Ignition	Yes
Air Volume (cfm)	824
Catalyst	Yes
Weight (lbs)	22.5
Commercial Warranty	1 year
